貳、交換學生報告 (以下每點皆需敘述至少500字並附上照片)

500-word Exchange Feedback with photos

Hello, my name is Kamolchanok Voradech. However, let me start from the moment I entered the university. About NUK University, I was surprised by the quite different environment from my home country. Here I travel by bike to school and the campus environment is shady and safe. The service and delivery are very convenient. Usually, I have never lived in a dormitory before and this is my first time abroad in a long time, so it took me a lot of time to adjust. The first obstacle was language. My English is satisfactory for communication. But Chinese, although I used to study in Thailand for some time. But when actually using it, it's still not fluent and illegible because Taiwan uses traditional Chinese, which is different from what I learned in writing. So, I attended a Chinese language class. It improved my Chinese because when I learned the language here, I immediately use what I had learned with my Taiwanese friends or other people there, known as talking to native speakers. It's very good and makes me develop faster. The teacher is very nice and friendly, she gave me the Chinese name 方佳茉.

My field of study is Applied Economics, which I think teaching here is quite comfortable and open. It teaches students to express their opinions and think outside the box, which is a very good thing. I hope my country supports this kind of teaching. In addition, I am impressed with the teacher. The teachers who teach us are all kind. Most of the subjects that I take focus on teaching students to prepare and be ready to enter the labor market, which is a good thing and is very important to me now.

As for the dormitory, there are clear rules. But maybe because there is a delay in explaining the details. Therefore, there may be misunderstandings in some matters. I think it would be better to have the latest time to enter the dormitory earlier. The facilities in the dormitory are good. There are many activities and sports. I choose to play tennis here, there are enough courts and good standards.

Traveling in Taiwan is convenient. Buses, bicycles, MRT, and THSR can be used to travel easily with just one card. The welfare of students in this country is very good. Whether it's discounted admission to art and museums or discounts on transportation. Buddy, the stuff the university prepared for me. Helped me very well since moving into the dormitory, including contacting various documents. In addition, my buddy helped and recommended me and my friends to take time to travel to many provinces such as Tainan, Taichung, and Taipei. It was a very fun trip and I enjoyed spending time with my friends and to travel in exotic environments and cultures.

I have so many good and funny memories here. This year I had a countdown at Taipei 101. With friends even though it was raining so hard to see anything, but it was a very fun experience. I spent a lot of time on cultural trips and my favorite thing here would be the food. In Taiwan, food is very delicious, especially 火锅 and 臭豆腐. It can be said that it is our favorite menu for Thai people. That almost makes me want to open a restaurant like this in Thailand.

Finally, this exchange visit to Taiwan was a very good experience for me, meeting many new friends from different nationalities. I am grateful to NUK for giving us the opportunity to exchange both knowledge and experience. I am very happy to be a part of this exchange program, although, for a short period of time, it feels like one of the most rewarding lives of my life.
